

η^2 Variance Decomposition: Structural vs Hyperparameter Factors

Structural = β , v , architecture class Hyperparameter = LR, width, initialization

Advection (β sweep)
S_group $\eta^2=0.157$ | H_group $\eta^2=0.091$
 $\triangle$ Thesis PARTIAL / NOT SUPPORTED

Burgers (v sweep)
S_group $\eta^2=0.673$ | H_group $\eta^2=0.002$
 $\triangle$ Thesis PARTIAL / NOT SUPPORTED
