

NTK Condition Number — at initialization ($\log_{10}$ scale)
Raw range: $[5.88\text{e}+09, 7.16\text{e}+11]$ — ALL configurations catastrophically ill-conditioned
(dark cells have $\kappa \approx 4 \times 10^9$, light cells $\kappa \approx 1.3 \times 10^{11}$ — both are failures)
